Work from anywhere, unplug somewhere.

As a result of the recent COVID-19 pandemic, the 'Work From Anywhere' concept has become a reality and workcations are becoming increasingly popular around the globe. Getting away and being free from your regular workspace is an option which is both conducive and relaxing to many. In the current climate, anywhere and everywhere can be your office and the worlds of work and travel have begun to increasingly overlap. Thailand is one of the most popular workcation destinations for travellers and digital nomads who are looking to expand their horizons along with their networks.

Tourism Authority of Thailand [TAT] has compiled a list of a total of 170 products and tourism services for tourists interested in a workcation or staycation in Thailand, with marketing potential from across the country. These hotels and tourist attractions were divided into 25 routes that showed diversity and popular appeal and catered to the needs of a variety of lifestyles. More importantly, each and every entry in the list feature the four main concepts of workation-Healing, Fulfilling, Motivating, and Comforting. We are confident that potential workationers and staycationers will be impressed with the accommodation and attractions that we are striving to promote and that they will contribute to creating a whole new working world.
